LOVE

Where Does It Hurt?

Are busy lives and uncomfortable mattresses causing you to move a little slower these days? If you suffer from minor aches and pains, you're not alone. Frequent pain is a commonplace experience in the general population. Research shows that most people can think of at least one occasion in the past month, or even in the past week, when they had a body ache or experienced muscle soreness.

Developed by a biologist in Korea, PowerStrips utilize natural elements and energies to create a perfect pain-relief environment for your body. This synergy allows heat and energy from the body to be reflected back into the parts of the body to which PowerStrips are applied to amplify your pain-relieving results.

Manufactured in a state-of-the-art facility, PowerStrips harness the benefits of cutting-edge technologies and ancient herbal remedies to provide a safe, all-natural solution for your regular pain-management needs.

POWERstrips™

PowerStrips are a Class 1 medical device uniquely designed to provide temporary relief of minor aches and pains.

Featuring a fusion of modern technology and ancient energies, PowerStrips provide effective pain-relieving results to areas of the body that are in need of a little extra love.

Make PowerStrips the solution to your regular pain-management needs. Natural elements such as germanium, marine phytoplankton and red ginseng go into the making of PowerStrips to help provide optimum temporary relief of your common ailments. These help to redirect the body's natural heat and energy onto the areas of the body to which PowerStrips are applied. An all-natural adhesive layer also makes PowerStrips safe for daily use.
