LIGHT

Better Delivery

SolarStrips dissolve on the tongue in seconds, delivering abundant whole-food nutrition to the body immediately without the synthetic or indigestible chemicals found in traditional nutritional supplements. This unique delivery method allows water-soluble nutrition to be absorbed into the bloodstream, bypassing the normal digestive tract, for more immediate and complete replenishment of the body.

SolarStrips also feature "open cell" marine phytoplankton. Since the human body lacks the enzyme required to break down the silica shell that naturally encases marine phytoplankton, the nutrients from most marine phytoplankton products are never absorbed. By contrast, marine phytoplankton offered exclusively from ForeverGreen has been harvested using patented technology that removes this shell without the use of heat, freezing, or chemicals, allowing the body to utilize each and every nutrient.

SOLARstrips™

SolarStrips provide a proprietary blend of open-cell marine phytoplankton for a nutritious, energetic boost in a unique and convenient delivery system. SolarStrips are the most effective way to edify your body with the nutrition it needs to perform at its best.

Marine phytoplankton are a naturally-occurring whole-food source packed with amino acids, trace minerals, vitamins, enzymes, essential fatty acids and antioxidants. SolarStrips are each made with 37.5 milligrams of marine phytoplankton, making it the perfect complement to your daily health habits.

Specially designed to dissolve on the tongue, SolarStrips offer whole-food nutrition anytime, anywhere! Carry them in your purse or pocket and enjoy them anytime you're in need of an energy or mood boost. Plus, you'll rest easy knowing you're edifying your body with the most complete nutrition source on the planet every time you enjoy great-tasting SolarStrips.
